Percentage of Years 1992-2012 that Fruit Tree Chill Units Were Within the Specified Range. Data from All Southeast Texas National Weather Service Stations with 10 plus years of data. Some Central and East Texas sites are included for comparison. AP means airport. Numbers in Parentheses are years of data when less than 20. CTYD is the distance in counties one must pass through going south to the Gulf. A rough measure of distance to the Gulf.
